

Mentor Introductions

Each fellow is assigned a mentor whose expertise aligns with the fellow's project and technical focus.

During the Orientation Session, mentors introduce themselves by sharing:

- Professional background
- Current role
- Technical expertise
- Research or industry experience
- Fellowship responsibilities
- Preferred communication methods

Following the introductions, fellows meet their assigned mentors and schedule their first mentorship session.

The mentor-fellow relationship is intended to provide continuous technical guidance, professional development, and constructive feedback throughout the fellowship.
