

Becoming a Certified THiNK Reseller

Certification marks the transition from learner to implementation partner. Upon successfully completing the training program, participants become officially recognized as **THiNK Certified Resellers**, authorized to deploy THiNK AI solutions for clients.

Certified resellers gain access to a range of benefits, including:

- Eligibility for client implementation projects
- Access to THiNK deployment frameworks and technical resources
- Continued mentorship from THiNK engineers
- Participation in partner networking events and developer communities
- Advanced training and specialization opportunities
- Recognition within the THiNK Partner Network

Certification also carries professional responsibilities. Certified resellers are expected to:

- Maintain high technical and ethical standards.
- Deliver quality solutions aligned with THiNK implementation guidelines.
- Participate in continuous professional development.
- Keep technical skills current with emerging AI technologies.
- Protect client data and maintain confidentiality.
- Represent THiNK professionally in all client engagements.

Certification is not the end of the learning journey but the beginning of a long-term partnership. Through continuous learning, advanced certifications, community engagement, and real-world implementation experience, certified resellers contribute to the growth of a trusted network delivering responsible AI solutions across Africa and beyond.
